

# perma STAR CONTROL

TIME and IMPULSE mode combined in a single system

## Machine controlled delivery

perma STAR CONTROL consists of reusable drive unit and a single use lubricant cartridge. Because the lubrication system is mechanically driven, the discharge rate is independent of ambient temperature and back pressure.\* The perma STAR CONTROL can be connected to the machine control which limits lubrication to only when the machine is in operation. Inspection of the perma STAR CONTROL is made easy with the transparent lubricant cartridge, LED lights and the LCD screen and the ability to communicate with the machine controller.

\*Total resistance to grease flow must be less than the pressure delivery capability of the lubrication system.
